Experience Summary

James L. McCollough – Currently Vice President of Operations and Supply Chain of Bright Automotive, Inc., Mr. McCollough has over 20 years of automotive industry experience. He has led operation start-ups in Mexico, Korea, and China with local sourcing of material supply and led product migration from other regions of the world. In addition to plant operations, Mr. McCollough has led global sourcing initiatives to meet market and customer requirements and achieved operational excellence using leading edge technologies, lean tactics, six sigma process capability focus and benchmark metrics.

Prior to joining the Bright Automotive Team, Mr. McCollough was Vice President of Operations for Takata Corporation and held global responsibility for automotive safety electronic operations with manufacturing footprints in North America, Europe, and Asia. Mr. McCollough consolidated North American manufacturing to mainland China, while achieving industry leading quality levels.

Prior to his position at Takata Corporation, Mr. McCollough was Director of Operations for Eaton Corporation, where he directed manufacturing operations serving automotive, military, and aerospace markets. Mr. McCollough oversaw vertically integrated manufacturing environments, his responsibilities included product migration to start-up facilities in Mexico.

Mr. McCollough started his career at Texas Instruments (TI) where he held various Senior Operations positions. He began his career at TI as a manufacturing engineer and quickly migrated into Operations and worked in international operations. Mr. McCollough's background included managing of start-up facilities in Asia and material sourcing localization.

Mr. McCollough acquired his BS in Mechanical Engineering from the University of Rhode Island (URI) and had completed a portion of his MBA from URI.
