Experience Summary

Nigel Francis - Through Nigel's leadership, the eSolutions team focuses on the development of advanced engineering intellectual property for scientific community and market-share gain.

Nigel is an engineering and management executive with more than 25 years of international experience in the automotive and defense industries at Ricardo, Century Dynamics, ESI Group, RLE International, and Mercedes Benz Technology. Nigel has a combination of vehicle-engineering and business acumen, including start-up, IPO, and global-market knowledge, as well as experience in styling, design, and vehicle engineering at all levels—from component through systems to full vehicle. Nigel has worked with global OEMs, systems integrators, and suppliers including Mercedes-Benz, BMW, Audi, GM, Ford, Chrysler, BAE Systems, Magna, Eaton, and Continental. Nigel has general management experience at both small and mid-sized global automotive engineering firms, has led major automotive programs, project teams, and product-innovation activities, and has overseen strategic business development and strategic financing.

Nigel served for 15 years as an officer in the British Army Reserve during which he commanded both engineering and explosive ordnance disposal units that included humanitarian de-mining in Africa. He is a holder of the Territorial Decoration.
